

ANNALS OF APPLIED MATHEMATICS

Vol. 35 No. 2

Contents

Some Problems in Radiation Transport Fluid Mechanics and Quantum Fluid Mechanics	Boling Guo, Jun Wu (111)
The Qualitative Analysis of A Two Species Amensalism Model with Non-monotonic Functional Response and Allee Effect on Second Species	Xinyu Guan, Hang Deng (126)
Note on the Stability Property of the Vanishing Equilibrium Point of An Ecological System Consisting of A Predator and Stage Structure Prey	Xiaoyan Huang, Fengde Chen (139)
A Blow-up Result for A Class Doubly Nonlinear Parabolic Equations with Variable-exponent Nonlinearities	Qingying Hu, Donghao Li, Hongwei Zhang (145)
Asymptotic Eigenvalue Estimation for A Class of Structured Matrices	Juan Liang, Jiangzhou Lai, Qiang Niu (152)
The Cauchy Problems for Dissipative Hyperbolic Mean Curvature Flow	Shixia Lv, Zenggui Wang (159)
Global Existence of Mild Solutions for the Elastic System with Structural Damping	Wei Shi (180)
Hypercyclic Multiplication Composition Operators on Weighted Banach Space ...	Cui Wang, Huiqiang Lu (189)
Existence of Periodic Solution for A Kind of (m, n) -order Generalized Neutral Differential Equation	Shaowen Yao (197)
Multiplicity of Positive Solutions to A Class of Multi-point Boundary Value Problem	Bao Zhao, Yunrui Yang, Yonghui Zhou (212)
